## SUMMARY

---

data enthusiast, data visualization developer, full stack developer, passionate programmer and quick learner, love to read books and listen to music.

## EXPERIENCE

---

**Gramener**, Bengaluru — *Senior Data Specialist*

Dec 2015 - PRESENT

### Roles & Responsibilities -

Here, my responsibility is to develop data driven products. As per the role, I perform different types of analysis such as descriptive/predictive on the public/private domain data and deliver the insights in the form of dynamic/static visuals.

**In Time Tec**, Jaipur — *Software Developer*

Apr 2014 - Dec 2015

### Roles & Responsibilities -

My role and responsibilities were to develop web applications and solutions for clients.

## EDUCATION

---

**Rajasthan Technical University**, Jaipur

B.Tech in Computer Science - 70%

Sep 2009 - Sep 2013

## SKILLS

---

**Backend** - Python, PHP, SQL (Mysql / SQLite),

**Frontend** - HTML5, CSS3, Javascript, JQuery, D3.js

**OS** - Linux (Ubuntu & Fedora), Windows (7,8,10)

## PROJECTS

---

- [Task Distribution System](#)

It is a personal project to manage multiple systems through a master system and execute the given task on the available system node and provide the result back to the user. ([more....](#))

- [GitHub Repo Visualization](#)

It is a personal project to scrap data of public repositories using Github API and use that data to create a visualization about number of repositories and their used languages. ([more...](#))

- [XMLJSON](#)

xmlsjson is an open source project which converts XML into Python dictionary structures (trees, like in JSON) and vice-versa. ([more...](#))

- **Narratives & Visual Mailers**

It is an automatic service for performing narrative data analysis on the daily basis and sends an automatic email notification which contains insights in terms of static visuals.

## CERTIFICATIONS

---
