### Experience

---

#### VMware, India / Member of Technical Staff

Feb 2018 - PRESENT, Bangalore

At VMware, I am working as a Software Developer inside Iaas Team. Being a part of Iaas Team, my responsibilities are to manage and provide on-premise infrastructure to our customers. I closely work with native VMware products for virtualization such as ESXi, VSAN, and NSX-T to leverage our customers with a solid, consolidated and fully managed Software-Defined-Data-Center Stack.

#### Gramener / Senior Data Specialist

Dec 2015 - Feb 2018, Bangalore

We at Gramener, help our clients to understand data in a better way. Gramener is a Data Visualization company which converts digital data into visuals as humans are less comfortable to understand the raw form of digital data.

As a Senior Data Specialist, my responsibilities were to provide web solutions to clients in terms of reports/dashboards using their data. Data was the base of my daily work and top of that I used the stack of technologies such as Python/Javascript to create the solutions. I used many Python libraries & frameworks such as Pandas, Numpy, SQLAlchemy, Scrapy, Tornado to manipulate and store the data in the memory and finally used D3.js to create visuals to represent digital data so that end user could easily understand the pattern and trend of the data.

#### In Time Tec / Software Developer

April 2014 - Dec 2015, Jaipur

I worked in In Time Tec as a Full Stack Developer. I used to handle both front-end and back-end over there and majorly worked upon MVC Design Pattern. My role and responsibilities were to develop web applications and solutions for clients. I worked on multiple technologies to accomplish my role such as PHP, Python, Drupal, HTML, CSS, Javascript, JQuery, SQL.
